Technical documentation for website development

Instructor: Kurmangazy Kongratbayev

Title of your project: ECO-qozgalys

Student: Altynay Turzhanova

ID: 180107216

About Project:

The site will provide information on how you can protect nature with little effort. There will be addresses for the delivery of plastic and metal in different cities, depending on the choice of the visitor during the entrance to the site. Eco-news from around the world will be disclosed. And an eco-shop of various handmade products will also be introduced.

Aims and goals of the project:

• to show that protecting nature is not so difficult by giving examples of daily routine easy things like: do not waste water while brushing the teeth, do not take plastic bags from market, do not heat your lunch in plastic packet or plate etc.

• to provide an opportunity for affordable eco shopping.

• to make available online information of World's ecologic news.

• to give the daily motivation to do something great for the nature.

• to teach how to sort the plastic and how to PROTECT RESTORE FUND easily.

Stages and terms of project creation:

• Site design, choose the right colors for profile, making prototype of inner pages of the site – 15 days.

• Creating the idea of structure of the inner pages and its functional part – 15 days.

• Using the knowledges of loading the data by fetch and XAMPP – the rest of the time.

STRUCTURE AND DESCRIPTION OF THE SITE
